## Headline over image in two lines

Visit page for more information

I want to work with a professional in **HTML/PHP, CSS, and JS** to create extremely clean and well-commented code that generates a responsive web page that looks good on desktop, tablet, and phone.

< Back · Home · Main Page

## This is the headline of the page

# A FEW NOTES on FUNCTIONALITY

This is the layout to be coded in PHP CSS JS

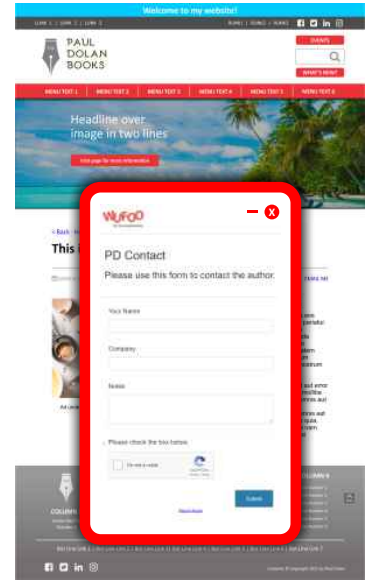

Just one page.

Each of the horizontal sections become separate PHP files

Each of the PHP files get their own external CSS

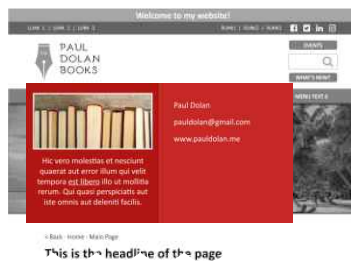

There's a non-modal pop up

There is an Announcement Bar with changing messages

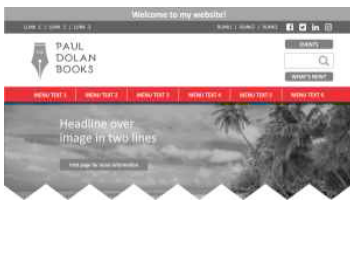

An infocard appears on hover-over logo

3rd party search app to be integrated SiteSearch360

There is a drop-down menu bar

There is an image slider

It's all just one page. Sort of.
